DS-A4 REMOTE INTERACTIVE DOCK FOR iPod/iPhone

Made for iPod iPhone RI

Enhancing iPod/iPhone Functionality with Onkyo Audio Expertise

Onkyo offers the latest update to its well-received line of RI (Remote Interactive) Docks for the iPod, adding full compatibility with iPhone. The DS-A4 links seamlessly with your home entertainment system to get the best out of your iPod/iPhone's music, movies, podcasts, and TV shows. Video signals are conveyed via either composite or higher-quality component video output. RI compatibility lets you control basic iPod/iPhone functions through your main Onkyo system's remote controller, with further functionality provided by the dedicated remote. Device-recharging and an on-screen display are among the other conveniences. So, if you want to add Onkyo audio expertise to iPod/iPhone versatility, take a close look at the DS-A4.

MAIN FEATURES

- iPod nano (1st to 6th Generations)
- iPod mini

Please note that 1st, 2nd, and 3rd generation iPod models are not supported. Updating iPod/iPhone software is advised before using the DS-A4.

DS-A4 REMOTE INTERACTIVE DOCK FOR iPod/iPhone

Integrating the iPhone and iPod Family with Onkyo Systems

Linked to your Onkyo system, the DS-A4 allows you to seamlessly incorporate audio and video files from virtually all iPhone and iPod models*. Now you can enjoy playing your music through a high-fidelity Onkyo system, and share your photos and videos on your living-room display.

**See previous page for full list of compatible models.*

iPod/iPhone Video Playback via Component Video

By connecting a compatible iPod/iPhone model to the DS-A4, you can view movies, music videos, TV shows, and video podcasts on a connected display. Component video connectivity ensures a stable, high-quality video signal output. The DS-A4 supports 480i and 576i output from the iPhone and iPod touch, and 480p and 576p from the iPod nano (3rd, 4th, 5th and 6th generations) and iPod classic.

On-Screen Display for Easier Navigation and Selection of Audio and Video Content

The DS-A4 comes with an on-screen display (OSD) mode that enables you to easily navigate and select video and audio content viewed on a connected display. In OSD mode, you can browse your iPod/iPhone content using the dedicated remote controller.

Dedicated Remote Controller for Enhanced Control and Functionality

There's no need to handle your iPod/iPhone while it's sitting in the DS-A4, as it comes with its own remote controller that controls all basic playback functions. With its simple layout and easy operability, this palm-fitting remote controller is especially handy for navigating and selecting your music via the OSD.

Recharge Your iPod/iPhone While Enjoying Your Music and Video

Connect the DS-A4 to an AC power source, place your iPod/iPhone in the cradle, and you can play back audio and video files all day long. While you're enjoying your device's music and video in the comfort of your living room, you're also fully recharging the battery for when you're on the move.

Added Functionality and Integration Through the RI (Remote Interactive) Function

The DS-A4 can also be connected through Onkyo's proprietary RI interface. This gives you access to a variety of useful functions, such as System On/Off, Auto Power On, Auto Selector (Direct Change), and Sleep Timer.
